

Context isn't just king, it is the whole kingdom

What is MCP?

- MCP stands for Model Context Protocol
- Standardizes tool automation and orchestration
- Enables integration of custom tools and workflows
- Facilitates communication between models and tools

Features

- Get the current date
- Magic 8 Ball for fun answers
- Convert Markdown to PDF

How to Use

1. Start the MCP server
2. Access tools via API
3. Integrate with your workflow

Demo: Magic 8 Ball

- Ask any yes/no question
- Get a random answer

Demo: Markdown to PDF

- Convert documentation to PDF
- Use Bootstrap for styling

Thank You!
